

In regards to LPFM - if you allow expansion of the LPFMs to overpower low power FM stations I may not be able to hear "Air 1" @ 90.1 FM. This station is very important to me and so many others in our community. If "Air 1" is overpowered and listeners can't reach the signal we will lose the impact that it has had and continues to have on so many lives. It's encouragement for those who are depressed, even suicidal. It's life-changing for those who are involved in criminal activities. This station is so good for the public. And because the music is REAL music (not just hymns) people accidentally stumble upon such positive messages of encouragement who otherwise would not have the opportunity to change their lives for the better of themselves, their families and the public communities around them. Please do not let the LPFM overpower stations such as "Air 1", a lower power FM that impacts so many lives across America and right here in my city.
